June 16th 1831

Commenced this Town June 3^d & finished,
except the Meanders of a part of the North side
of Lake James and a part of the line between
Sec. 344 which will be run South, from
the 7 line, when 7. 38 is surveyed & the
Meanders can then be taken. This 17th having
been at work 15 days, much of which has
been stormy weather, of rain & hail.

The Variation is 5 degrees, and all the South
part of the Township is run at that,
but in the North, it required less on the
East side, and more on the West side of
Lake James to run near parallel.

In consequence of disability I have been 3
times obliged to change Chainmen, and this
together with the attraction, which exhibits
more or less about all the Lakes may account
for the irregularity which appears in the
work. The North lines are all marked
through the Lakes, and all the East ones
which have less than $\frac{1}{2}$ a mile in Lake

The Meanders are all taken at a variation
of 5th 00 E.

between Sec. 7 & 8. At that point although very narrow it is soft mud bottom, and impassible and from there to the West end, it has a filthy appearance, being filled with Pond Lillies & patches of rushes, yet perfectly impassible without swimming; The peninsula noted on the North side in Sec. 8. is about 50 to 300 wide, and makes into the Lake with a slight Curve to the Left. The land on it is low & covered with Timber I have noted the bearing from 2 stations in order to the ascertaining of the length of it. Considering it useless to run to the point, for the purpose merely of shewing its position, the land being of no value,
